#### **About Ethernity**

**Ethernity Networks** is a technology solutions provider that developed and delivered data processing technology used in high-end Carrier Ethernet applications across the telecom, mobile, security and data center markets. The Company is currently working to accelerate commercialisation through the launch of its Smart NIC combined with virtualised software solutions, based on its validated data processing technology. The Company's core technology, which is populated on programmable logic, enables delivering data offload functionality at the pace of software development, improves performance and reduces power consumption and latency, therefore facilitating the deployment of virtualization of networking functionality.

The Company is headquartered in Israel.
